ropimex® HyGentle®

Product design and material combination
for maximum hygiene

Product design:

Hygiene starts with the design. Corners, angles or geometries that are ill-suited for cleaning and disinfection are avoided to the greatest possible extent.

Material composition:

Cleanability and disinfectability are prioritized in the selection of the materials required for manufacturing the product. This is aimed at achieving an optimum where soiling and microbiological pollution are concerned. Porous, absorbent surfaces must be avoided.

Cleaning and disinfection:

We test and document the materials of our products in terms of their natural microbial contamination, just as we document their cleanability and disinfectability with commercially available detergents and disinfectants.

For your safety:

ropimex® products conform to the highest safety standards. The telescopic screens including the trolley, the Vario rail system and the folding screens all bear the GS tested safety mark issued by the German TÜV (technical inspectorate).

Telescopes of the new generation

ropimex® HyGentle®: Product design and material combination for maximum hygiene

The ropimex® telescopes of the new generation are optimized in handling, cleaning and disinfection by means of seamlessly integrated mechanics and particularly smooth, hygiene-friendly surfaces. ropimex® curtains, washable and disinfectable complete the hygiene concept.

Smooth telescopic tubes and Plastics for one hygiene-friendly surface.

Bending mechanism seamlessly integrated.

Integrated stop mechanism for the curtain rings

Tail with Locking - fixed telescope at rest

If the curtain rings are loaded they release themselves from the eye-lets of the curtains and therefore avoid injuries and damage to the system.

Model RTH:
with hooks, fold-down
and swing-out

You can't trip over things that hang on the wall. Which is why we created ropimex® telescopic screens, the screen that's only there when it's needed.

After use, simply push the screen together and turn it towards the wall. Your room is back to looking its familiar self.

Mobile screens

FG95

telescopes
disinfectable

Curtains with
disinfectant
washable

The mobile screen '95 is ready to use in only a few seconds and is quickly returned to its parked position. Its smooth and easy movement, low weight and high degree of stability ensure simple handling.

The mobile screen, fitted with one or two telescopic screens, is ideal for mobile screening, e.g. for corridor occupancy, in multi-bed rooms, in the outpatients department or at the gynaecology chair.

Mobile screen '95 with one or two telescopic screens in use

FG95 trolley

Model	
FG95	Trolley. 155x60x40 cm (H/D/W), 4 castors ø 100 mm, 2 of which are lockable. Aluminium anodised, glass-fibre reinforced polyamide, corrosion-resistant, disinfectable.
LA	Electrically conductive castors available for an extra charge.
UKB	Universal clamp for holding a second telescopic screen. All telescopic screens in the "RTI" series can be used in the FG 95 trolley.

RTI 2.2	100 cm → 220 cm
RTI 1.6	80 cm → 160 cm
RTI 1.3	70 cm → 130 cm

We recommend the following fitout:

Model	With one telescopic screen	Extension	Curtains
RTI 2.2	Telescopic screen, fold-down	220 cm	TCS 212, CQ 212
Model	With two telescopic screens	Extension	Curtains
RTI 2.2	Fold-down telescopic screen, (can only be used in the trolley, not suitable for the UKB clamp)	220 cm	TCS 212, CQ 212
RTI 1.6	Telescopic screen, fold-down	160 cm	TCS 152, CQ 152
RTI 1.3	Telescopic screen, fold-down	130 cm	TCS 122, CQ 122
UKB	Universal clamp for use of a second telescopic screen, telescopic screens: RTI 1.3, RTI 1.6		

Vario rail system

RVS

telescopes
disinfectable

Curtains with
disinfectant
washable

One system – any number of options!
Slanting walls? Acute angle? No problem!

We supply wall connectors, which can be continuously adjusted up to 180 degrees – and compensate for virtually any asymmetry in the architecture. Move or renovation: The rail system is designed to adapt to new requirements at any time.

RVS in the admissions department

Mounting above the lintel

Connection cassette ceiling

Recommended curtains (see p. 22-23)

Trevira®CS Bioactive

Cleanique®

Vario rail system

RVS

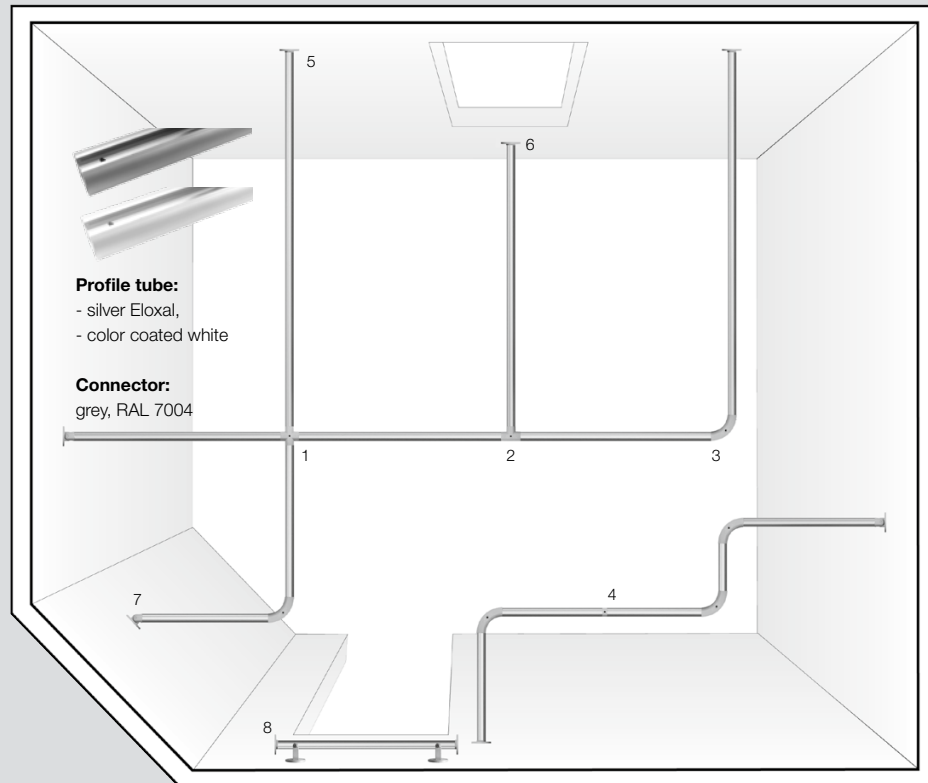

- quickly assembled
- mega variable
- durable

Easy ordering: A simple sketch suffices!

Simply prepare a hand-drawn, dimensioned sketch of the required room layout, enter the widths and lengths as well as the room height and the required headroom.

We will put together the complete system for you.

Profile tube:
- silver Eloxal,
- color coated white

Connector:
grey, RAL 7004

Curtain ring RVS/VR

Curtain ring made of unbreakable polyamide. Releases itself from the curtain eyelet if overloaded (approx. 2 kg).

Ringstopper: for fixation of a curtain ring at the beginning or the end of the rail.

Silicone cover profile
RVS/AP

With the RVS connectors, you can create cabs as you wish

1 Cross-connector (RVS/KV)

2 T-connector (RVS/TV)

3 Corner solutions without sharp edges: with the curved connector RVS/BV (radius 60 mm)

4 **Change later:** simply disconnect the profile tube and install the connector of your choice, e.g. linear connector RVS/LV

RVS-Wall connections - for every requirement

5 **Free-standing end:**
End cap RVS/EK stops the curtain.

6 **Straight at the wall:**
Wall connector RVS/WA

7 **Sloped walls, acute angles:**
the Vario wall connector RVS/WAV compensates for and levels out asymmetries up to 180° and length differences up to +/- 5 mm.

Flexible to the ceiling - RVS ceiling connectors

8 **Mounted directly under the ceiling:** with ceiling bracket RVS/DH (distance from top of ceiling to bottom of rail approx. 6 cm).

Suspended at headroom height: with the adjustable ceiling mount (+/- 20 mm) RVS/DS.

For free-standing end RVS rails: adjustable double ceiling mount (+/- 2cm) RVS/DDS.

Easy above the lintel: e.g. at windows or doors using the wall connector RVS/WAS

Anchoring on profile rail:
possible along the whole length by means of square nut; for adjustable ceiling mount RVS/DS or with ceiling bracket RVS/DH. Max. spacing: 2 m.

Anchoring via all connectors:
Standard threaded hole for screwing in the adjustable ceiling mount RVS/DS or the ceiling bracket RVS/DH ensures firm support.

Curtains

Trevira®CS Bioactive

ropibel®

Flame-resistant curtains can save lives!

ropimex® multifunctional textiles have more than proven themselves in practical application – whether here with us or in Tahiti or even Yakutsk.

We only use flame retardant qualities that will meet even the most stringent hygiene requirements. The longevity of our materials meanwhile guarantees a most cost-effective price-performance ratio.

Trevira®CS Bioactive

TCS: ropimex®-curtains made of Trevira®CS Bioactive have been tried and tested for 20 years

Permanently flame-retardant and anti-microbial

- 100% Polyester, permanently flame-retardant
- the fabric meets fire class B1 as per DIN 4102-1 and B-s1 d0
- with the fire resistance indelibly anchored in the molecular structure
- Trevira®CS Bioactive is permanently anti-microbial
- permeable to daylight, ideal if there are several partitions in a room
- light-fast, dimensionally stable, crease-resistant, long service life
- certified to Oeko-Tex standard 100
- fabric weight: ca. 115 g/m²

wall-mounted

Folding screen
wall-mounted

Infill panels: non-see-through
but translucent

Non-see-through 360° hinges.
Tearproof

10 years warranty
on hinge system

RFW wall mounted in park position

Flexibly usable as a screen or partition in the hospital and care sector, the robust and impact-resistant folding screen is positioned in seconds and parked back against the wall after use. The number of leaves can be extended at a later date. Non-see-through but translucent leaf infill material with high-quality aluminium profile creates a pleasant, light atmosphere.

Modern leaf designs, available in different colours, give the folding screen an individual touch.

Available in 10 colours and 4 design options

Folding screens

RFW

mobile

disinfectable

RFW in parking position

Mobile folding screen: the classic example of adaptability and versatility. Mobile folding screens, which are used here today and there tomorrow, offer the greatest possible spatial flexibility in everyday care and treatment work: in hospitals and care of the aged, in doctors' surgeries as well as in clinical rooms. At the same time you guarantee patients the necessary discretion. Position, fold open, fold together after use and roll away – care of the easy-clean surfaces made of aluminium and scratch-resistant polycarbonate is just as easy as the handling. Visually the design award-winning folding screens contribute to the general feeling of well-being – in the doctor's surgery or in a clinic.

Available in 10 colours and 4 design options

Column mounted

This room divider offers the greatest possible flexibility for hospitals and clinics. DIVI max is available in 3 versions : attached to the wall, mobile, or attached to a column. The board (front and back) is made from a high-quality HPL (High-Pressure-Laminate) by Resopal with stable frame construction. Easy to clean and/or to disinfect.* At the reception. In the foyer. Wherever you quickly need to create an area enabling a minimum of peace and maximum privacy.

*Request our test reports concerning the disinfection based on DIN EN ISO 2812-4:2007.

Available in 5 colours

Folding wall

DIVI max

Technical data

Wall mounted

Non-see-through 360° hinges.
The RTC unit (ropimex®-Turn&Connect) enables 360° leaf rotation.

Accessories available:
Clamp set for service rail
Spacer for wall-mounting

Mobile

Note: Mounted on a trolley, the folding screen is only mobile. It is therefore not possible to convert it to a wall-mounted screen or to fix it to an equipment rail or column.

Lightweight
paravents

RLP

CE

ropimex®-Lightweight paravents are convincingly easy to handle. The 360° non-see-through hinges each leaf enable each leaf to be moved into the required position. Standard fabric covering with staph CHEK fabric, with Trevira®CS for an additional charge.

Please note: Paravent leaves must always be positioned at an angle to each other, unless the ropimex® base (model RLP/C) is used.

RLP in retirement

Folded together, a storage space can be found anywhere

Base for stabilising a single or several paravents to make use of the open width or to form a routing system

Covering: without folds. Opaque 360° hinges.

Leaf-wise colour selection also possible.

Standard version without castors. Can be supplied with castors for an additional charge.

Covering (see page 23)

staphCHEK

Colours	light blue, white, yellow, beige, mint

Covering (see page 23)

Folding curtain

PLiO

CE

PLiO® is a flame-retardant folding curtain that was developed for hypersensitive facilities. PLiO® is ideal for users whose hygiene concept opposes the use of classic curtains that need to be regularly cleaned, usually by external service providers. PLiO® is quickly usable and just as quickly pushed together again to save space, and that without expanding again. The surfaces are smooth and suitable for all commercially available disinfectants. The transitions between the individual panels (connecting joints) are also smooth and flush. This helps to avoid undesirable grooves where dirt or germs could accumulate.

PLiO in hospital

Ideal room divider

PLiO® is quickly usable and just as quickly pushed together again to save space.

Folding curtain

PLiO

ropimex® HyGentle®: Product design and material combination for maximum hygiene

Smooth surface: No grooves able to accumulate dirt or germs

Joints: permanent antibacterial

Fire protection class: as per DIN EN 13501 B – s2 d0

Available in 3 colours

Curtain rings

Semi-open PLiO® curtain ring for curtain systems that are permanently installed and hence not freely accessible, e.g. ropimex® RVS

Ringstopper for fixation of a curtain ring at the beginning or the end of the rail.

In combination with the RVS Rail system generally white powder coated (see page 19-21)

ropimex®-Telescopic screen cubicles Model RKLE (wall fixing)

With this space-saving model it takes just a few seconds to create a screen for washing, changing, radiotherapy or inhaling, either as a corner solution or as a U-shaped solution.

Recommended curtains (see p. 22-23)

staphCHEK

Cleanique®

Satisfied customers all over the world

Since 1976, ropimex® has been busy finding solutions to protect the privacy of the sick and those in need of care.

The telescopic screens of the early years are still in use today. From them a system developed, whose diversity, use and combination options provide a suitable solution for each and every customer.

All these properties, top advice from authorised stockists and the fastest possible delivery have secured ropimex® more than 80,000 satisfied users to date, all over the world.

**For your
safety**

ropimex® products conform to the highest safety standards.

The telescopic screens including the trolley, the Vario rail system and the folding screens all bear the GS tested safety mark issued by the German TÜV (technical inspectorate).

ropimex® curtains made of Trevira®CS pass every fire test worldwide and are tested and certified to the Öko-Tex standard 100 Europe-wide.

ropimex® Privacy Systems - 43 years of experience in designing medical inventory for hospitals, therapy centers and care facilities. Our products meet the regulatory requirements for medical devices.

The systems are designed so that a patient zone / intimate zone can be created for virtually any existing condition - stationary or mobile.

ropimex® privacy systems are the customizable accessories for medical devices such as patient beds, treatment couches and treatment chairs in medical facilities.

ropimex® privacy systems are compliant with the Swiss Privacy Policy, which requires confidential handling of patient-related data. These patient-related data also include explicit discussions between patients and patients and the preservation of privacy in treatment and patient care.
